

MobileIron Install Instructions For Android Devices

Tips

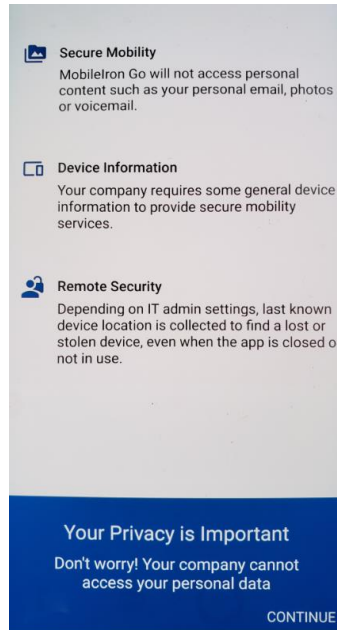

- First make sure the device has internet access.
- Be aware that during this process your device will need to be encrypted which could take some time to complete.

Installation Instructions

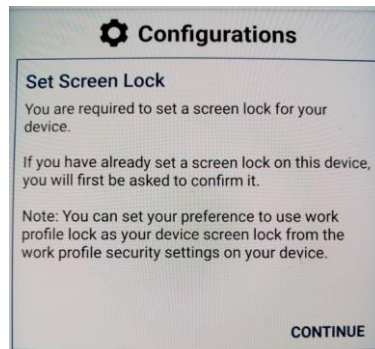

<p>Install & Open MobileIron Go app from the Google Play store.</p>	
<p>When the app launches it prompts for the user name and password. Enter your "EMAIL ADDRESS" as the user name, then tap Continue.</p>	
<p>When prompted enter your network password. Same password you use for your AHSN. Be sure that "I own this device" is selected for your personal device, and tap continue.</p>

<p>Tap Continue.</p>	
<p>Tap continue to create your work profile.</p>	

How to use the new work profile

1. To access the work profile and view the work apps follow the next steps.
 - a. Go to your home screen and swipe up
 - b. Tap the work profile at the bottom of the screen.

- c. Notice that some apps have not been installed yet like Email+ be patient this process will take a few minutes. The following apps will be installed. Email+, Docs@Work, Zoom, Google Play (Replaces Apps@Work).
 - d. Optionally, Google Chrome can be installed on the work profile and required to sign into zoom. This is **REQUIRED**, if you want to start hosted meetings from the mobile device from an outlook meeting shortcut. To install Chrome, click on the google play store in the “My work apps” section, and click on the library tab at the top, and tap install.
2. Accessing Email has not changed much, but there will now just be a single app “Email+” for all functions such as email, calendar, contacts, notes and tasks. By default, Email+ opens to email, and you can click the 3 stripes at the top to access the other functions.
